

**Amendments to the Specification**

Please replace paragraph [0046] with the following amended paragraph:

**[0046]** As shown schematically in Figure 4, the second sliding guide at transducer element 20 has a groove 23 that extends along a spiral-shaped curved path ~~(and extends 360 degrees around transducer element 20)~~ that runs coaxially to axis of rotation 11. On inner clamping jaw 10b of the first clutch part, there is a projection 24, which matches groove 23 and, when inserted into groove 23, may be moved along the spiral-shaped curved path relatively to transducer element 20.
